

## SNC Email Manual Conversion Steps for SMTP Authentication – Thunderbird

Upgrading to the new SNC Email requires an update to your email client settings. Please follow the steps below to ensure a seamless transition to the new system.

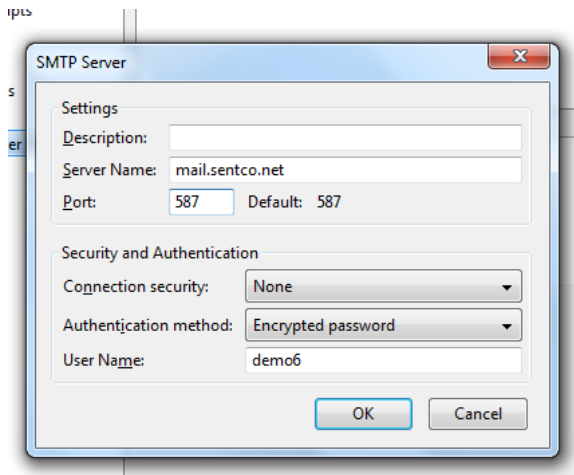

1. Open Thunderbird. Click the **Tools** menu at the top of the screen and select **Account Settings**.

2. Select **Outgoing Server (SMTP)** from the list on the left. Then, click on your SENTCO.NET account listed in the middle of the screen. Next, click **Edit**.

3. Enter the **Port** number 587. Then, in the **Authentication method** field, choose Encrypted password.

4. Click **Ok** and then click **Ok** again.

You have now made the required changes.
